I'm a third year Information Technology undergraduate at SLIIT with hands on experience in Full-Stack development and AI integration through both academic projects and real-world client work. I have a strong foundation in building web applications, backend systems, and AI-powered solutions.

Alongside my studies, I founded a startup with a friend, which has given me experience in teamwork, problem solving, and bringing ideas to life. I am now seeking an internship to gain industry-level experience, further develop my skills, and contribute to real-world technology projects.

KEY PROJECTS

Skill Mentor Platform System (LMS)

- An end-to-end platform designed to streamline professional mentorship through secure role-based access, automated booking validation, and real-time dashboard updates.
- Tech Stack: Spring Boot 3, React, PostgreSQL, Clerk Auth, Tailwind CSS, Redis.

E commerce website for customize neon sign light (Client Project)

- A production-ready e-commerce platform featuring a real-time customization engine that allows users to design, preview, and generate technical specifications for custom neon signs.
- Tech Stack: React, Express.js, MongoDB, TypeScript, Node.js, HTML5 Canvas, Vercel Serverless, Tailwind CSS.

Smart University Facility Management System

- A centralized campus operations hub designed to automate resource booking and facility management through a secure, role-based architecture and real-time tracking.
- Tech Stack: Java/Spring Boot 3.5, React, PostgreSQL, JWT/OAuth2, Tailwind CSS.

AI Powered Career Path Help System (SLIIT Nexar)

- Developed a secure MERN-stack platform featuring an AI career advisor and some AI features(Career Path Simulator, Skill Gap analysis, ATS friendly CV analysis), Interview Scheduling, Study Plan Generator, Job request posting, role-based administrative dashboards, and automated PDF reporting with a focus on enterprise-grade security.
- Tech Stack: React 19, Node.js, MongoDB, Express, Groq AI, TypeScript, JWT.

Financial Tracker App

- Developed a personal finance ecosystem featuring a dynamic data-visualized dashboard and a custom budgeting engine to help users monitor spending habits through an intuitive interface
- Tech Stack: Kotlin, Android Studio, Room DB, LiveData, UIX.

If you want see my other projects please go through my LinkedIn ([Denuwan Yasanga](#))

EDUCATION

BSc (Hons) in Information Technology

2023-2027 (3rd Year Student)

(Undergraduate student in SLIIT University Malabe)

GPA - 2.57(Present)

GCE Advanced Level Examination - (Technology Stream)

2022(2023)

(SRI Subhuthi National School Battaramulla)

Engineering Tech	- C
Science for Tech	- B
Information and communication Technology	- C

EXPERIENCE

FOUNDER & FULL STACK DEVELOPER

Pshyco Lab IT

Founded and developing Full Stack web applications, mobile applications, dashboards, POS systems, and AI-assisted software solutions.

Feb 2026 - Present

- Building and deploying scalable software solutions, including e-commerce platforms, POS systems, and AI-integrated dashboards.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, Java, Dart, HTML5, CSS3
- Frontend: React.js, Next.js, Framer Motion, Tailwind CSS, Responsive Design
- Mobile: Kotlin
- Backend: Node.js, Express.js, Python, Java, Spring Boot, REST API Design
- Databases: MongoDB, Firebase (Firestore & Auth), MySQL, PostgreSQL, Real-time Database Design
- AI & LLM Integration: Groq AI, Claude API (Anthropic), Gemini API, Prompt Engineering, AI Chatbot Development
- Auth & Security: JWT, OAuth 2.0, Session Management, Role-Based Access Control (RBAC)
- DevOps & Cloud: Vercel, Render, Google Cloud, GitHub Actions, SSL Management
- Tools & IDEs: GitHub, VS Code, Cursor AI, Antigravity, Figma, Framer
- UI/UX & Motion: Figma, Wireframing, Prototyping, Framer Motion, , Design Systems, Accessibility

CETIFICATES

- Certificated of Spring Boot
Backend Engineer (STEMLink)
- Relational to Document Model
(on-demand) (MongoDB)
